Table DF-7: Market Risk in Trading Book

Qualitative Disclosures

- Market Risk is “the risk that value of ‘on’ or ‘off’ Balance Sheet positions will be adversely affected by movements in equity and interest rate markets, caused by exchange rates and commodity/ asset prices”.
- The portfolios covered by the standardized approach for computation of market risk are as under:
 - Securities Held under Held for Trading (HFT),
 - Securities Held under Available for Sale (AFS),
 - Equity portfolio held under HFT/AFS
 - Trading position in Derivatives,
 - Derivatives entered into for Hedging Trading Books exposures,
 - Open Foreign Exchange Position & Open Gold Position.
- The rest of the assets - i.e. Investments under Held to Maturity portfolio and advances - are treated as Banking Book. Brief description of the Market Risk Management objectives and policies are as below:
- **Policies**
Bank has well laid out Treasury Policy (covering Investment Portfolio, Foreign Exchange Operations & Derivative Operations), Asset Liability Management (ALM) Policy and Market Risk Management Policy in place duly approved by the Board. The policies ensure that operations in Securities, Equity, Foreign Exchange and Derivatives are conducted in accordance with sound & acceptable business

practices and are as per the extant Regulatory Guidelines, Laws Governing Transactions in Financial Instruments & Financial Markets. The policies are reviewed every year; and if required more frequently, to incorporate changes in Rules & Regulations by Regulatory Authorities / Government, Business Requirements and Economic Environment.

- **Liquidity Risk**

Bank uses 'Cash-Flow Approach' & 'Stock Approach' for managing, monitoring & measuring liquidity risk. Liquidity Risk is tracked through maturity or cash flow mismatches. Use of maturity ladder and calculation of gaps at various 'time-buckets', is adopted as standard tool for measuring Liquidity Risk. Prudential limits on tolerance level of mismatches are in place and monitored & reported to RBI on a fortnightly basis. Under stock approach, various ratios / limits are in place. Stress tests are carried out at various levels of adversity. The Liquidity / Funds requirements under Stress Situations, sources of raising the funds & its possible impact on Profit & Loss are worked out at quarterly interval.

Short-term Dynamic Liquidity Statement is prepared and monitored on a monthly basis to assess the Liquidity Position, which takes into account the Business Growth.

- **Interest Rate Risk**

Bank uses Traditional Gap Analysis (TGA) to assess the impact on the Net Interest Income (NII) of the bank in short run, i.e. upto end of Financial Year. Bank also uses Duration Gap Analysis (DGA) to assess long-term impact of changes in interest rate on Market Value of Equity (MVE) in terms of RBI Guidelines.

- **Foreign Exchange Risk**

The Bank has fixed various exposure limits such as Maximum Daylight Limit, Overnight Limit, Aggregate Gap Limit (AGL), Stop Loss Limit and Deal Size Limits. Bank has also fixed VaR limit on Foreign Exchange position which is being monitored on daily basis. Derivative transactions are monitored by fixing prudential limit for stop loss and a cap for PV01 on the outstanding derivatives for market making position.

- **Equity Price Risk**

In terms of Banks' Treasury Policy, limits are in place with respect to Trading Book size in Equity, Deal size, Holding Period & Stop Loss Limits. These limits are monitored on a daily basis.

- **Structure and Organisation of Market Risk Management function:**

The Board of Directors approves policies covering management of Market Risk. The Board is supported by three levels:

- Supervisory Committee of ALM & Risk Management
- Asset Liability Management Committee (ALCO)
- General Manager (Risk Management Department)

- **Scope:**

Bank has put in place various limits to measure, monitor & manage market risk. Day Light Limits, Overnight Limits, Deal-size Limits, Aggregate Gap Limits (AGL), Individual Gap Limits (IGL), Stop Loss Limits, Trading Book size, Issuer wise Limits, VaR limits, NOOP limit, etc.

The limits are monitored on daily basis and a reporting system to the top management is in place. Stress testing Framework for Liquidity & Market Risk is in place & stress tests are conducted on quarterly basis. The results are deliberated at ALCO & placed before the Board.

▪ **Hedging & mitigating risk:**

Policies for hedging Banks' position are laid down in the Bank's Treasury Policy. Hedge transactions for banking books are assessed/ reviewed at periodic intervals.

Quantitative Disclosures

- Bank has adopted the standardized Duration Approach as prescribed by RBI for computation of capital charge for market risk and is already fully compliant with such RBI guidelines. The capital requirement for market risk are as under:

(Rs. in million)

Risk Category	Capital Charge
Interest Rate Risk	13126.63
Equity Position Risk	4189.54
Foreign Exchange Risk (including gold)	121.50
Total capital charge for market risk under standardised duration approach	17437.67

Table DF-8: Operational Risk

Qualitative Disclosures

- Operational Risk is the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events.
- Operational Risk exists at all levels and at all business lines.
- At present, operational risk is largely managed through internal controls , Operational risk Management Framework and audit system.
- .
- Bank has put in place the following measures to control / mitigate operational risk.
 - System of delegated authority covering credit and expenditure
 - Book of instructions and issuance of instructions through circulars from time to time
 - Continuous training process
 - Preventive vigilance
 - Insurance
 - Risk Based Internal Audit
 - Outsourcing policy
 - Compliance Policy
 - Policy on Business Continuity
- Bank has well laid down Operational Risk Management Policy, which covers :
 - Organisational structure
 - Identification, assessment, monitoring and control of operational risk.
 - Capital Charge for operational risk
 - Reporting framework
 - Guidelines on reporting and collection of Operational Risk Loss Data
 - Policy on mapping of activities to 8 business lines

- Bank has an appropriate and independent organizational structure with oversight mechanism for management of Operational risk, which includes Operational Risk Management Committee (ORMC) of Top Executives and a separate Risk Management Department looking after the Operational Risk. Besides, there is a separate Board Level Committee i.e., Supervisory committee of the Board to oversee the functioning of Risk Management and ALM.
- ORMC deals with new product approval process, analysis of frauds, analysis of operational risk loss data, analysis of the exercise of mapping bank's activities and income into 8 business lines.
- Bank has Product Evaluation Committee in place which evaluates the new as well as modifications in products/ processes before presenting the same to ORMC.
- The bank has adopted Basic Indicator Approach for calculating capital charge for operational risk. Bank has been continuously working on all the qualitative and quantitative requirements for The Standardized Approach (TSA) and various data elements of AMA i.e. Internal Loss Data, External Loss Data, Business Environment and Internal Control Factors (BEICFs) and Scenario Analysis. Bank has already received a parallel run approval for TSA and is in process of implementing Integrated Risk Management Software solution.
- As per RBI directives, the bank has to maintain capital for operational risk under Basic Indicator approach (BIA) w.e.f. 31.03.2008. The capital charge as per BIA on 30.09.2015 is Rs. 16276.06 million.

Table DF-9: Interest rate risk in the Banking Book (IRRBB)

(a) Qualitative Disclosures

Interest rate risk may arise where changes in market interest rates might adversely affect Bank's financial position. The immediate impact of changes in interest rates is on Bank's earnings through changes in its Net Interest Income (NII). A long-term impact of changes in interest rates is on Bank's Market Value of Equity (MVE) or Net worth through changes in the economic value of its assets, liabilities and off-balance sheet positions. Bank holds assets, liabilities and off balance sheet items with different maturities or re-pricing dates which may be linked to different benchmark rates. This creates exposure to unexpected movements in interest rates.

Traditional Gap Analysis (TGA) is used to measure and monitor Interest rate risk through Rate Sensitive Gap (RSG). Impact of changes in interest on Net Interest Income (NII) is computed. Limit on RSG upto 1 Year is fixed to limit impact of interest rate changes from earning perspective. Interest rate sensitivity statement as per TGA is prepared as on the last day of each month. ALCO reviews the same on monthly basis. Impact of changes in broad categories of assets and liabilities, i.e. deposits, advances, investments and others upto the end of the financial year is worked out.

In terms of RBI guidelines, Bank also carries out Interest Rate Sensitivity as per Duration Gap Analysis (DGA) on monthly basis to capture impact of changes in interest rates on economic value of bank's assets and liabilities in banking book and thereby on Market Value of Equity (MVE). The impact is worked out assuming 200 bps parallel shifts in yield curve.

Framework:

Bank has formed Asset Liability Management Committee (ALCO), headed by Chairman & Managing Director/ Executive Director, which is responsible for evolving appropriate system and procedures for identification and analysis of liquidity/market risk and has laid down ALM policy of the bank. The ALCO is assisted by a dedicated 'ALM Desk' and an independent 'Mid-Office'. Supervisory Committee of the Board of Directors on ALM and Risk Management oversees the functioning of ALCO and also the implementation of the system & procedure for Asset Liability Management (ALM).

(b) Quantitative Disclosures

The impact of earnings and economic value of equity assuming a percentage shift in interest rates is as under:

		(Rs. in million)
	Parameter	Impact
1	Earnings at Risk (NII): estimated impact on NII with adverse change in rate of interest by 2.50% (up to 1 year)	12868.88
2	Market value of Equity: 200 bps shock	12520.31

Table DF-10: Counterparty Credit Risk

Qualitative Disclosures

The Bank deals in two groups of derivative transactions within the framework of RBI guidelines.

- i) Over the Counter Derivatives
- ii) Exchange Traded Derivatives

The Bank deals in Forward Rate Agreement, Interest Rate Swaps, Cross Currency Swap and Currency Options in Over the Counter Derivatives Group.

In Exchange Traded Derivatives Group, the Bank trades in Currency Futures and Interest Rate Futures. The Bank is trading & Clearing member with two Exchanges viz. National Stock Exchange (NSE) & MCX Stock Exchange (MCX-SX), on their Currency Derivative segment as permitted by Reserve Bank of India. The Bank carries out proprietary trading as well as trading on behalf of its customers in currency futures on these exchanges. The Bank has set up the necessary infrastructure for Front, Mid and Back office operations. Daily Mark to Market (MTM) and Margin obligations are settled with the exchanges as per guidelines issued by the Regulators.

The Bank trades in Interest Rate Futures on National Stock Exchange. The bank has necessary infrastructure for Front, Mid and Back office operations in place. Daily Mark to Market (MTM) and margin obligations are settled with the exchange as per guidelines issued by the Regulators.

The Bank undertakes derivative transactions for proprietary trading/market making, hedging own balance sheet and for offering to customers, who use them for hedging their risks within the prevalent regulations. Proprietary trading/market making positions are taken in Rupee Interest Rate Swap, Currency Futures and Interest Rate Futures. While derivative instruments present immense opportunity for making a quantum leap in non-interest income and also for hedging market risk, it exposes the Bank to various risks. The Bank has adopted the following mechanism for managing different risks arising out of derivative transactions.

In terms of the structure, operations in the Treasury Branch are segregated into following three functional areas, which are provided with trained officers with necessary systems support and their responsibilities are clearly defined.

- I) Front Office - Dealing Room. Ensures Compliance with trade origination requirements as per the Bank's policy and RBI guidelines.

- II) Mid-Office - Risk Management, Accounting Policies and Management
- III) Back Office - Settlement, Reconciliation, Accounting.

Mid Office monitors transactions in the trading book and excesses, if any, are reported to Risk Management Department for necessary action. Mid Office also measures the financial risk for transactions in the trading book on a daily basis, by way of Mark to Market. Daily Mark to Market position is reported to Risk Management Department, for onward reporting of the risk profile to the Directors' Committee on the Assets and Liability Management.

In case of corporate clients transactions are concluded only after the inherent credit exposures are quantified and approved in terms of approval process laid down in the Treasury Policy for customer appropriateness and suitability. The necessary documents like ISDA agreements are duly executed. The Bank has adopted Current Exposure Method for monitoring credit exposures.

b) Treasury Policy of the Bank lays down the types of financial derivative instruments, scope of usages, and approval process as also the limits like the open position limits, deal size limits, stop loss limits and counterparty exposure limit for trading in approved instruments.

Various Risk Limits are set up and actual exposures are monitored vis-à-vis the limits. These limits are set up taking in to account market volatility, business strategy and management experience. Risk limits are in place for risk parameters viz. PV01, stop loss, counterparty credit exposure. Actual positions are measured against these limits periodically and breaches if any are reported promptly. The Bank ensures that the Gross PV01 position arising out of all non option derivative contracts is within the 0.25% of net worth of the Bank.

c) The Bank also uses financial derivative transactions for hedging its own Balance Sheet Exposures. Treasury Policy of the Bank spells out approval process for hedging the exposures. The hedge transactions are monitored on a regular basis. The notional profit or loss calculated on Mark to Market basis, PV01 and VaR on these deals are reported to the Assets Liability Committee (ALCO) every month. Hedge effectiveness is the degree to which changes in the fair value or cash flows of the hedged items that are attributed to a hedged risk are offset by changes in the fair value or cash flows of the hedging instruments. This exercise is carried out periodically to ensure hedge effectiveness.

d) The hedged/un-hedged transactions are recorded separately. The hedged transactions are accounted for on accrual basis. All trading contracts are Mark to Market and resultant gross gain or loss is recorded in income statement.

In case of Option contracts, guidelines issued by FEDAI from time to time for recognition of income, premium, and discount are being followed.

To mitigate the credit risk, the Bank has policy in place to sanction limits to Counterparty banks and Counterparty clients. The Bank adopts Current Exposure method for monitoring counterparty exposure periodically. While sanctioning derivative limit, the competent authority may stipulate condition of obtaining collaterals/margin as deemed appropriate. The derivative limit is reviewed periodically along with other credit limits.

The customer related derivative transactions are covered with counterparty Banks, on back-to-back basis for identical amount and tenure and the Bank does not carry any market risk.

The Bank does not recognize bilateral netting. The derivative exposure is calculated using Current Exposure Method (CEM) and the balance out standing as on Sept 30, 2015 is given below.
